Ways to Make ANY Assignment More Resistant to ChatGPT

ChatGPT accessible at:
https://chat.openai.com/chat

1. ChatGPT does not have access to all Internet info, especially after 2021

Use current/modern info/events/sources,
Localization (info from class, regional info),
Require personalization (experiences/opinions)

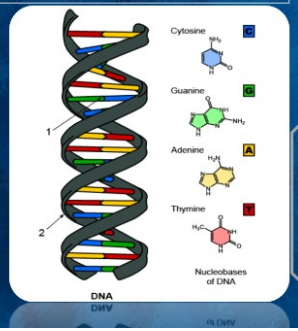
2. Incorporate hands-on learning and dynamic assessments

- Incorporate Discussions: students expected to answer how & why (*accountability for knowledge learned*)
- Use additional pedagogies: Student Presentations, Student Videos , Debate, Project Based Learning, Role-Play/Scenarios, Flipped Classroom, etc.

3. Chat GPT can not read images or video

EXAMPLE:

What kind of structure is the molecule shown in the diagram?



- Use images & videos in assignments to increase engagement & critical thinking

a) Multi-strand
b) Ladder
c) Double helix
d) Double vertex

4. Maximize student motivation to learn

Ensure students know relevancy of topics & assignments, and have time for reflection and opportunity to apply new skills learned
