6 Key Things ALL Faculty Need to Know About AI

AUA American University of Armenia

1. **AI is an excellent tool for Teaching & Learning:** aids in instructional design/course preparation, helps students learn in many different ways

2. **AI is not "just" for cheating.** AI helps students learn via: added examples, summaries, simulations, practice, scaffolding, and much more

3. **60 to 70% of students are already using AI in their education**

4. **Everyone MUST develop AI Literacy** to be competitive in the job market and to function as effective citizens in this new AI world

5. **There are different types of AI: generative AI** (Text: ChatGPT, Bard, Bing AI; Images: Midjourney, Stable Diffusion, Dall-E2), **Model and Detect** (ex. face recognition, autonomous vehicles), Predictive (shopping), & **others**

6. **Instructors need a mindset of adapting** to new AI realities, integrating AI into teaching, & continuously learning about AI developments
